

# NAME

**Harshit Pandey**

**Student Developer | Web Developer | AI & Game Systems  
Enthusiast**

**Portfolio Website :** <https://harshittpanday.github.io/Portfolio/>

---

## EDUCATION / BACKGROUND

I am currently a PCM (Physics, Chemistry, Mathematics) student with a strong interest in software development and real-world application building. Alongside academics, I actively pursue self-learning in web development, backend systems, and AI-based tools.

My learning approach is highly practical — I focus on building projects rather than only studying theory. This has helped me develop real development skills including problem-solving, debugging, UI design, and system structuring.

---

## TECH STACK

- HTML, CSS, JavaScript
- Firebase (Authentication & Realtime Database)

- Git & GitHub
  - Basic AI integration concepts
  - Web hosting (GitHub Pages, Netlify)
  - Game development basics (Canvas-based projects)
- 

## PROJECTS

---

### **ChatApp V1**

A real-time chat application built with authentication and live messaging features.

It allows users to send and receive messages instantly using a backend system.

Focused on UI responsiveness and real-time data syncing.

Deployed as a working web application with live access.

Live: <https://cha1app.netlify.app/>

GitHub: <https://github.com/harshittpanday/ChatAPP>

---

### **Study AI**

An AI-powered study assistant designed to help students learn and revise topics efficiently.

It provides structured answers and improves study workflow through automation concepts.

Built with a focus on simplicity and usability for students.  
Hosted as a live web project with continuous improvements.

Live: <https://harshittpanday.github.io/study-ai/>

GitHub: <https://github.com/harshittpanday/study-ai>

---

## ✂ **BlockCraft**

A Minecraft-style sandbox game prototype built using JavaScript.  
It focuses on block placement mechanics and basic world interaction systems.

Designed as an experimental project to understand game logic and rendering.

Currently in prototype stage with ongoing improvements.

GitHub: <https://github.com/harshittpanday/BlockCraft>

---

## **WHY I AM DIFFERENT**

Unlike many beginners who focus only on tutorials, I focus on building complete working systems from scratch. I learn by creating real projects, debugging errors, and improving features over time.

My strength lies in:

- Rapid learning and implementation
- Building functional full-stack style projects

- Understanding system logic instead of only UI
- Consistent self-driven development practice

I do not treat projects as assignments — I treat them as real products. This mindset helps me think like a developer rather than just a learner.
