🚀 Intent: <https://inten1.vercel.app/>

Profile

Student developer passionate about building practical software and AI-powered products. I enjoy transforming ideas into real applications, focusing on user experience, scalable architecture, and continuous iteration through user feedback.

Currently building **Intent**, an AI-powered research platform that aggregates information from multiple online sources into a single search experience. My learning philosophy is project-driven, where every application serves as an opportunity to improve software engineering, problem-solving, and product design skills.

Technical Skills

Languages

- HTML5

- CSS3
- JavaScript (ES6+)

Frontend

- Responsive Web Design
- DOM Manipulation
- UI/UX Fundamentals

Backend & Database

- Firebase Authentication
- Firebase Realtime Database
- REST APIs
- JSON Data Handling

AI & Search

- AI API Integration
- Prompt Engineering Fundamentals
- Multi-source Search Systems
- Search Result Aggregation

Development Tools

- Git
- GitHub
- VS Code
- Vercel
- Netlify
- GitHub Pages

Currently Learning

- Node.js

- Backend Architecture
 - Search Ranking Systems
 - Product Design
 - Software Engineering Principles
-

Featured Projects

Intent

AI Research Platform

Live: <https://inten1.vercel.app/>

An AI-powered research platform that combines information from multiple sources including GitHub repositories, YouTube, news, and AI-generated explanations to simplify online research.

Key Features

- Multi-source search experience
 - AI-generated summaries
 - GitHub repository discovery
 - YouTube search integration
 - News aggregation
 - Continuous feature updates based on user feedback
-

ChatApp

Real-time Messaging Platform

Live: <https://cha1app.netlify.app/>

GitHub: <https://github.com/harshittpanday/ChatAPP>

Built a real-time chat application using Firebase Authentication and Realtime Database, enabling secure authentication and instant messaging with responsive UI.

Study AI

AI Learning Assistant

Live: <https://harshittpanday.github.io/study-ai/>

GitHub: <https://github.com/harshittpanday/study-ai>

Developed a study assistant that leverages AI to provide structured learning support, simplifying revision and improving the overall study experience.

BlockCraft

JavaScript Sandbox Prototype

Live: <https://harshittpanday.github.io/BlockCraft/>

GitHub: <https://github.com/harshittpanday/BlockCraft>

Designed a Minecraft-inspired sandbox prototype to explore rendering concepts, block placement mechanics, and interactive game systems using JavaScript.

Strengths

- Product-first development mindset
 - Strong debugging and problem-solving skills
 - Self-directed learner
 - Fast adaptation to new technologies
 - Experience turning user feedback into product improvements
 - Continuous project-based learning
-

Interests

- Artificial Intelligence
- Product Development
- Software Engineering
- Web Technologies
- Human-Centered Design
- Startup Ecosystems
- Game Systems
